

Launch of Dairy Value Chain Support Project for the Umande Cooperative Society :
Karachi Grounds, Umande on 5th October 2018

CETRAD carries out research to support rural development, especially in the arid and semi-arid areas of Kenya. This we do through research and development projects in different parts of the country. Through the results of one of our projects done in Mt Kenya region the Umande Cooperative Society has been identified for support to construct a house for a Milk Cooler Machine as one of the activities of a broader capacity building initiative to improve dairy value chain for the farmers in the area.

Photo: A large crowd of people gathered under a green and white striped tent for the launch of the dairy Value Chain Support Project. The event is taking place outdoors on a grassy field.
